

LYNX™ OBSOLESCENCE NOTICE

After several years of applications in different Industries worldwide such as Retail, T&L, Manufacturing and Healthcare, Datalogic is now announcing the obsolescence of the current Lynx product line, effective **March 31, 2019**.

Replacement Product Recommendation

The Lynx product line was based on Microsoft WEHH 6.5 operating system only. This has been very valuable in order to support a wide set of legacy applications, but as now current market trends are shifting towards more future proof OS like Microsoft WEC7 or Android™, Datalogic recommends customers migrate to different product concepts:

- Customers still requiring physical keyboard interface, can consider moving to other successful Datalogic product lines, such as Skorpio™ X4 or Falcon™ X4. This new family of products leverages successful form factor and ergonomics of previous X3 generation, and ensures investment protection by supporting both WEC7 and Android 4.4 on the same hardware
- If full touch is preferred, Datalogic offers a new range of very competitive PDA's, the recently announced Memor™ 1 or Memor™ 10. These products embed the latest Android enterprise version and also features the unique and differentiating technology of Wireless Charging, providing best in class reliability and an unbeatable service uptime
- For outdoor usage in field mobility scenarios, the recently announced Memor 10 represents the best option thanks to the embedded WWAN "LTE-Advanced" connectivity; also endorsed by Google as one of the first "Android Enterprise Recommended" certified devices for rugged applications
