

UniOP eTOP02

The eTOP02 is a compact HMI device with a brilliant TFT display and touchscreen interface. It is the ideal solution for applications where low cost and small size, without compromising performance, are a requirement.

- 3.5" TFT color display
- 256 colors
- 1/4 VGA (320x240 pixel) resolution
- Resistive touchscreen
- 1 MB user memory
- Connection to industrial bus systems and Ethernet (requires optional plug-in modules)

Highlights

The eTOP02 panel is a compact and low-cost product. It supports the rich common functionalities of the UniOP operator panels:

- Powerful and intuitive programming with the UniOP Designer 6 software
- Support of more than 130 communication drivers for industrial devices
- Optional modules for fieldbus systems (Profibus DP, CANopen, DeviceNet, Interbus) and Ethernet. Ethernet modules allow connection to field devices as well as programming the HMI from Designer.
- Dual-driver communication capability
- Advanced graphic capabilities
- Display dynamic data in numerical, text, bargraph and graphic image formats
- Recipe data storage. Recipe data can be transferred to a host computer using the Ethernet connection.
- Multilanguage applications. The number of runtime languages is limited only by the available memory. All text information in the application can be exported in Unicode format for easier translation.
- Powerful macro editor to configure touchscreen operation
- Alarms and historical alarm list. Alarm and event information can be printed or

transferred to a host computer using the Ethernet connection.

- Eight level password protection.
- Report printing to serial printer. Reports are freely configurable using Designer.
- Ethernet-based UniNet network to share data between UniOP HMIs and to serve data using UniNet OPC Server.
