GEFRAN
BEYOND TECHNOLOGY

GEFRAN

BEYOND TECHNOLOGY

More than fifty years of experience, an organisation with a strong focus on the customer's needs and non-stop technological innovation have made Gefran a benchmark in the design and production of sensors, systems and components for industrial process automation and control. Expertise, flexibility and process quality are the factors that distinguish Gefran in the production of integrated tools and systems for specific applications in various fields of industry, with consolidated know-how in the plastics, mobile hydraulics, heating and lifting sectors.

Technology, innovation and versatility represent the catalogue's added value, in addition to the ability to create specific application solutions in association with the world's leading machine manufacturers.

APPLICATION SECTORS

Thanks to its consolidated experience in the supply of process controls and an ongoing research and development programme, Gefran offers a series of solutions for all applications requiring accurate and safe control in heating processes with electric heaters to meet today's challenges in a variety of industries.

Gefran offers a wide range of products that are scalable in terms of both performance and characteristics, indispensable for management of various types of electrical resistors, such as infrared lamps, linear resistors, SiC, MoSi2 and graphite. Gefran's Power Controllers and SSR units are designed with a special focus on ease of use and configuration. In addition, Gefran's internationally patented system (Xtra) automatically triggers a safety mechanism in the event of a short circuit, which, combined with an automatic reset, guarantees continuity of production in the event of a momentary short circuit.

Not only resistive load control, but also connectivity, remote diagnostics, predictive maintenance and energy counting. These are just some of the additional features that allow devices to communicate and make decisions independently, basing their actions on the process data available to them, turning them into intelligent components.

THERMOFORMING

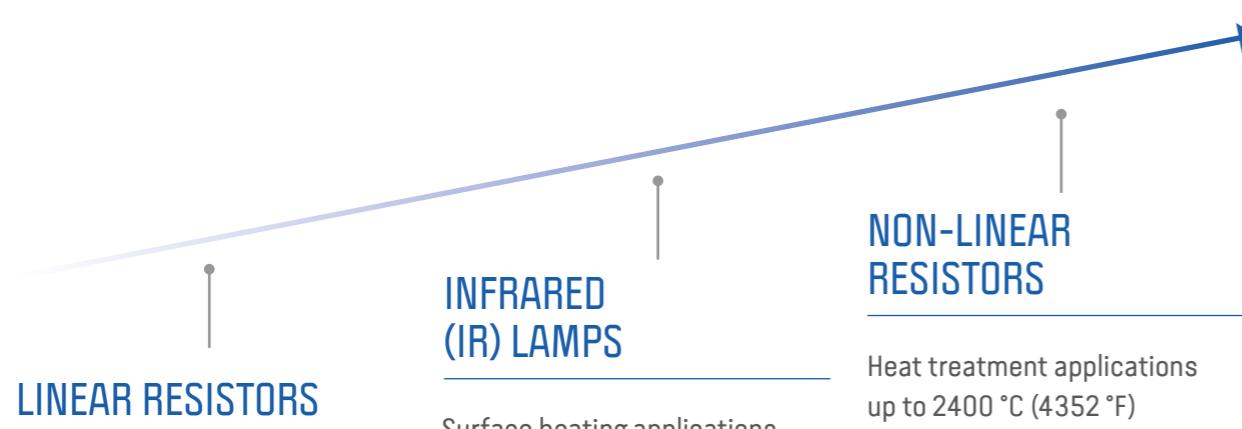

PHOTOVOLTAIC

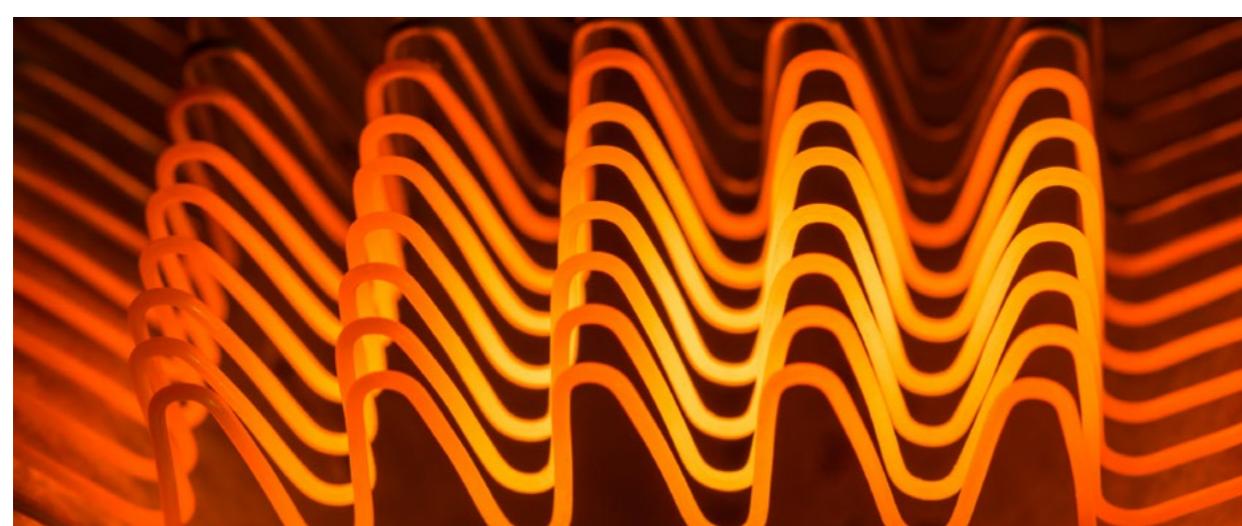

RESISTIVE ELECTRICAL LOADS

Electrical energy is transformed into thermal energy (heat) by devices called "electrical resistors".

Different types of resistors are used depending on the temperature of the heating process, requiring different types of control.

Heat treatment applications up to 2400 °C (4352 °F)
Medium/high current
Control Devices
• Power Controller

THE RIGHT SETTING FOR ALL IR HEATING LAMPS

Gefran offers a complete range of devices for precise control of infrared heating lamps, from long wave lamps to short wave lamps.

Infrared lamps are used in many applications due to their versatility and their ability to provide thermal energy with precision, high efficiency and energy savings.

Gefran Power Controllers, with their specific functions, allow safe, perfect control of infrared lamps, optimizing their performance and increasing their average operating life.

DEDICATED SOFT START IR

A dedicated Soft Start algorithm ensures precise control of overloads and the current peaks typical of infrared lamps in cold heating phases.

CONFIGURABLE TRIP MODE

Half Single Cycle mode allows you to control IR lamps by reducing flickering and eliminating EMC emissions. Phase Angle mode ensures perfect stability of control power.

FEEDBACK FUNCTIONS

Voltage, current or power control feedback functions permit perfect regulation, automatically correcting any variations in voltage and current so that exactly the amount of energy required is supplied at any time and under all conditions.

BROKEN LAMP DETECTION

Rapid reading of RMS current ensures that lamp breakage is reported in all control modes. The self-learning function of the thermal characteristics of lamps improves the accuracy of lamp breakage diagnostics.

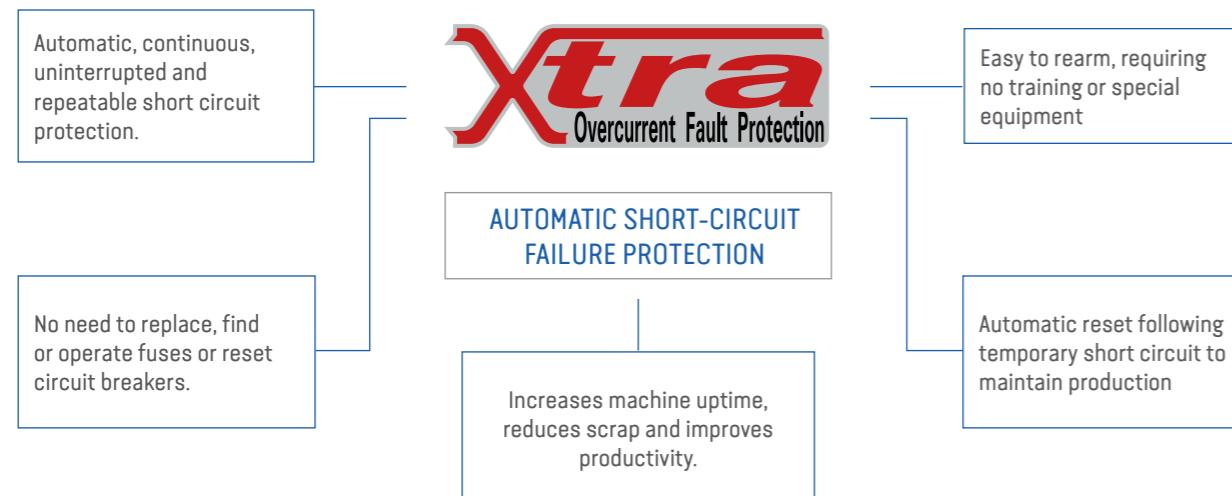

CURRENT LIMITS

The current limit function prevents the risk of exceeding the command limit. Peaks and RMS current value are constantly under control.

GEFRAN Xtra POWER CONTROL

PERMANENT COMPLETE PROTECTION

BENEFITS

Cost reduction and optimization of spare fuse stocks

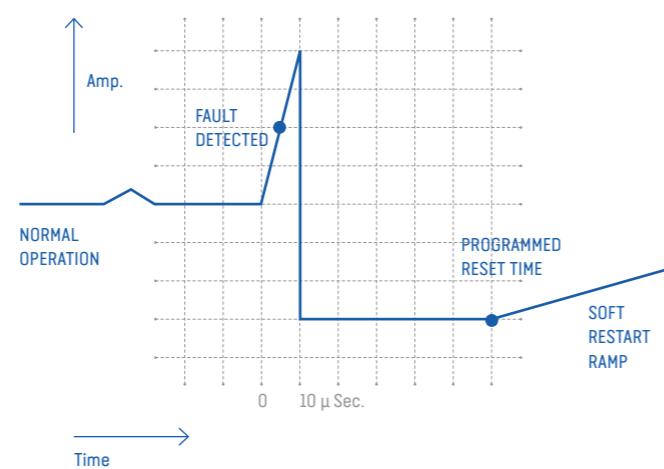

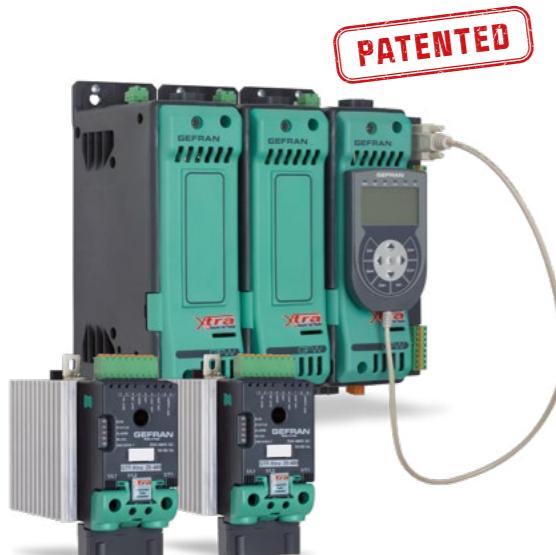

Guaranteed production

Easy to install with limited maintenance

Fully automated reset

SHORT CIRCUIT CURRENT RATING (SCCR)

WHAT IS SCCR CERTIFICATION

The amount of current that a component, if applied correctly, can safely withstand in the event of a failure.

WHERE IT IS APPLICABLE

In US industrial control panels used for machines or plants.

WHAT IS REQUIRED

Having sufficient protection against short circuits in industrial control panels to protect equipment and personnel from risks and damage.

WHO REQUIRES IT?

The Occupational Safety and Health Administration (OSHA) and the National Electrical Code (NEC), via Underwriters Laboratories (UL).

**SCCR RMS SYM
100KA / 600V**

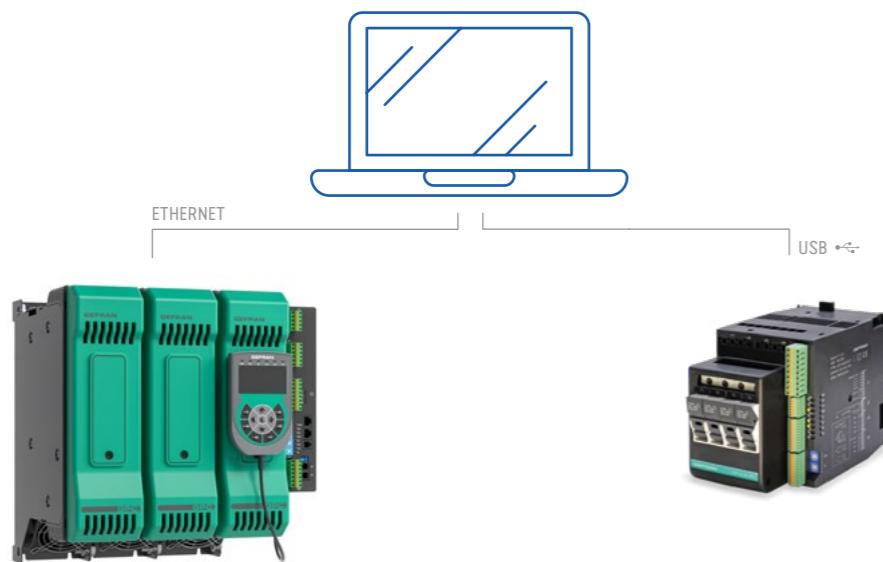

CONFIGURATION SOFTWARE

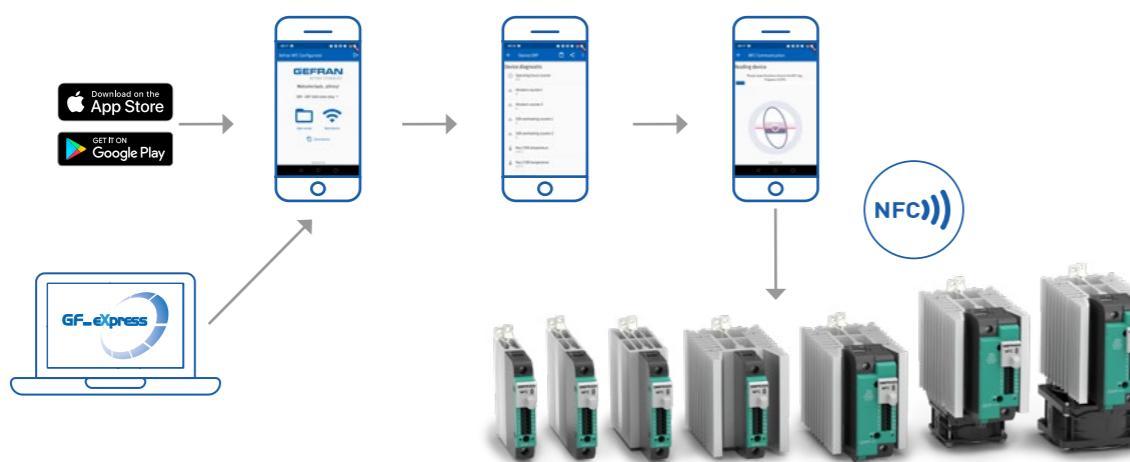

GF_eXpress is a software for configuration/parameterization of all GEFTRAN devices (components, automation products, drives and sensors).

The selection and parameterization of the device is simple and intuitive thanks to a completely graphic interface.

"GEFRAN NFC" APP - SMART CONFIGURATION

- Easy-to-use configuration
- Data monitoring
- Integrated diagnostic
- Backup and Restore configuration
- Remote sharing GF_eXpress configuration file

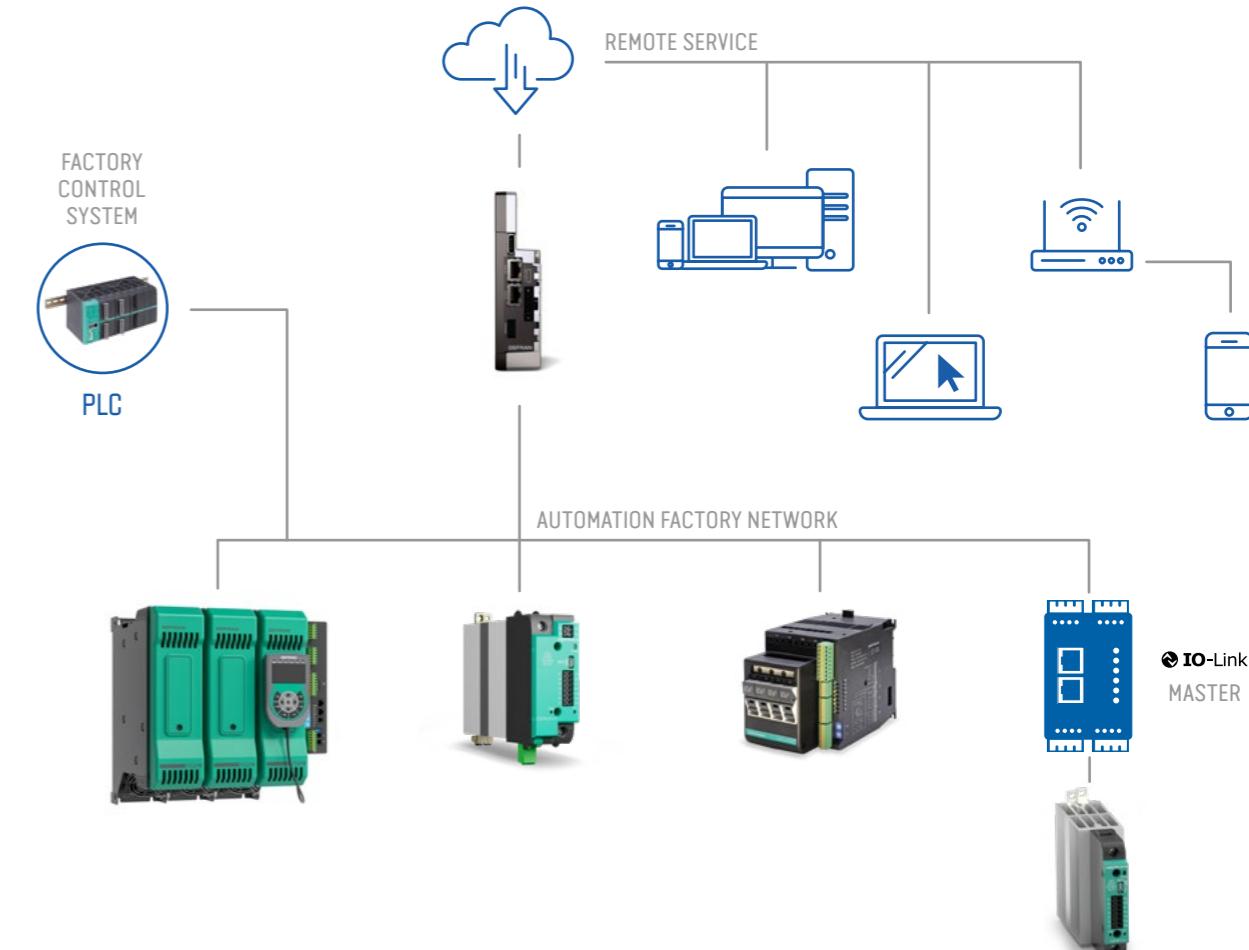

CONNECTIVITY

FACTORY INTEGRATION AND SYSTEM DIAGNOSTICS

Solid State Relay and Power Controllers are prepared for connection to centralized acquisition or control systems such as HMI and DCS within factory automation networks. Thanks to the wide range of communication fieldbuses available, Power Controllers may be connected with all major factory automation systems.

CERTIFICATIONS

ODVA and PI certification for Ethernet/IP and Profinet fieldbuses, respectively, guarantees the efficiency and compatibility of data exchange between the Power Controller and the control system.

SOLID STATE RELAY SERIES

SIMPLE AND ROBUST, SUITABLE FOR A VARIETY OF APPLICATIONS

- 10A to 120A
- Logic / Analogic command
- Load disconnection alarm (HB) and overheating alarm
- Single and three-phase
- With and without integrated heat sink

GFX4-IR / GFX4 POWER CONTROLLER SERIES

AN EXCLUSIVE COMPACT PRODUCT INTEGRATING PID & POWER CONTROLLER REGULATION

- 4 Solid State relays
- Up to 40A/channel
- 4 PID regulators
- Fieldbus communication

GRM POWER CONTROLLER SERIES

COMPACT AND VERSATILE, SUITABLE FOR THE CONTROL OF MEDIUM AND HIGH COMPLEXITY ELECTRIC HEATING PROCESSES

- From 10A to 120A
- Linear and non-linear resistors and transformers
- Single-phase
- Fully configurable command signal, firing mode and feedback
- Digital communication

GPC POWER CONTROLLER SERIES

SIMPLE AND PRECISE, IDEAL FOR ADVANCED ELECTRIC HEATING CONTROL

- 40A to 600A
- Linear and non-linear resistors and transformers
- Mono, two and three phase
- Fieldbus communication
- Preventive maintenance

THREE-PHASE	LOW THERMAL COEFFICIENT RESISTORS																				
	Resistor	1M 2S	1M 2S	1M 2S	3PH	3PH	3PH	x	x												I=P/ ($\sqrt{3}$ Vline)
	Long wave IR lamp	1M 2S	1M 2S	1M 2S	3PH	3PH	3PH	x	x												I=P/ ($\sqrt{3}$ Vline)
	HIGH THERMAL COEFFICIENT RESISTORS																				
	Medium wave IR lamp																				pw>6%P (***)
	Short wave IR lamp																				pw>6%P (***)
	Silicon carbide elements																				pw>6%P (***)
THREE-PHASE TRANSFORMER (**)	LOW THERMAL COEFFICIENT RESISTORS																				
	Resistor				2PH [A]/3PH [A]	2PH [A]/3PH [A]	2PH [A]/3PH [A]	x													I=1.2 (P+10%)/ ($\sqrt{3}$ Vline) (**)
	Long wave IR lamp				2PH [A]/3PH [A]	2PH [A]/3PH [A]	2PH [A]/3PH [A]	x													I=1.2 (P+10%)/ ($\sqrt{3}$ Vline) (**)
	HIGH THERMAL COEFFICIENT RESISTORS																				
	Medium wave IR lamp																				I=1.2 (P+10%)/ ($\sqrt{3}$ Vline) (**)
	Short wave IR lamp																				pw>6%P (***)
	Kanthal, Super Kanthal elements																				I=1.2 (P+10%)/ ($\sqrt{3}$ Vline) (**)
	Silicon carbide elements																				pw>6%P (***)
A	B																				

(*) It is recommended to always add a safety margin of at least 10% on the theoretical calculation of the current - Formulas valid if $Vline=Vload$
 (**) It is advisable to contact Gefran's specialized personnel
 (***) Valid only for GFW / GFW-Xtra
