CSM\_D4E-\_N\_DS\_E\_6\_5

**₩** (£ (€ ((()

## Slim and Compact Switch with Better Seal and Ensuring Longer Service Life than D4E

- Flat springs with an improved lever ratio of the built-in switch ensure smooth snap action and long life expectancy.
- Protection cover protects the built-in switch from dust and oil. Plunger incorporates a tough seal cap that lasts for a long time.
- One touch connector eliminates need for tedious wiring operations and reduces downtime for wiring and maintenance (models with standard, easy-to-use screw terminals are also available).
- Minute load model with gold cladding is optimal for electronic control.
- Molded terminal types as well as molded terminal types with operating indicator lamps are available for screw terminal systems.
- Approved by EN, UL, CSA, and CCC (Chinese standard). (Ask your OMRON representative for Information on approved models.)
- No difference in mounting pitch and characteristics between D4E

  N and D4E models.

Be sure to read Safety Precautions on page 9 to 10 and Safety Precautions for All Limit Switches.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

#### **Model Number Structure**

**Model Number Legend** (Not all combinations are possible. Ask your OMRON representative for details.)

D4E-\_\_\_N

(1)(2) (3) (4)

#### (1) Rated Current

- 1: 5 A at 125 VAC (1 A at 125 VAC/30 VDC for model with a connector)
- 2: 0.1 A at 125 VAC (0.1 A at 125 VAC/30 VDC for model with a connector)

#### (2) Actuator

- A: Roller plunger
- B: Crossroller plunger
- C: Plunger
- D: Sealed roller plunger
- E: Sealed crossroller plunger
- F: Sealed plunger
- G: Roller lever
- H: One-way action roller lever

#### (3) Terminals

- 00: AC connector
- 10: DC connector
- 20: Screw terminals without a cable
- 21: Screw terminals with a cable (right-hand)
- 22: Screw terminals with a cable (left-hand)
- 23: Molded terminals with a cable (right-hand)
- 24: Molded terminals with a cable (left-hand) (Cable is S-FLEX VCTF 3 m)

Note: The terminal specifications in model numbers are not the same for D4E-N and D4E Switches.

#### Comparison of New and Old Molded Terminal Models

Model Location of lead outlet	D4E-N	D4E
Right-hand	D4E-□□23N	D4E-□□21
Left-hand	D4E-□□24N	D4E-□□23

#### (4) Operation Indicator

None: Without operation indicator

L: Neon lamp (250 VAC)

L2: LED (24 VDC)

Note: Only the molded terminal models can be equipped with an operation indicators.

## **Ordering Information**

Ambient opera	ting temperature	-10°C to +80°C (with no icing)		
Ambient opera	ating humidity	35% to 95%RH		
Weight		Approx. 86 g (in case of roller plunger)		

### Engineering Data General-purpose Models

#### Electrical Durability (cos \$\psi\$=1)

Operating temperature: +5°C to +30°C Operating humidity: 40% to 70%RH.

Note: 1. The above values are initial values.

- The above ratings may vary depending on the model. Contact your OMRON representative for further details.
- \*1. Durability values are calculated at an operating temperature of +5°C to +35°C, and an operating humidity of 40% to 70%RH.
- \*2. The degree of protection is tested using the method specified by the standard (EN60947-5-1). Confirm that sealing properties are sufficient for the operating conditions and environment beforehand.

#### **Structure and Nomenclature**

#### **Structure**

Movable Plunger

Rubber Cap (NBR)

 Rubber cap provides a tight seal and ensures a long service life and smooth reset at low temperatures.

#### Seal Packing (NBR)

Seal packing withstands a pressure of 186 kPa.

Terminal Protection Cover

D4E
N has a wide wiring space of 10 mm horizontally.

Screw Terminal

Bearing · The bear

 The bearing load strength has been increased to prevent faulty resetting of the bearing, which may occur when the roller is pressed with excessive force.

#### Built-in Switch

- Switch cover ensures high insulation between the terminals and die-cast. Double insulation means that grounding is unnecessary. Meets UL, CSA, and EN standards.
- Prevents the movable piece from being pushed in too far, and thereby contributes to a longer service life.

#### Die-cast Case

· Zinc die-cast case is anti-corrosive and tough.

#### Wiring Ease

 Wired made easier using (D4CC-type) plug-in connector.

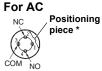

#### **Contact Form Screw Terminal Type Plunger**

(COM) 1 -- 2 (NC) — 4 (NO)

#### Lever

## (COM) 1 4 (NO)

## **Connector Type**

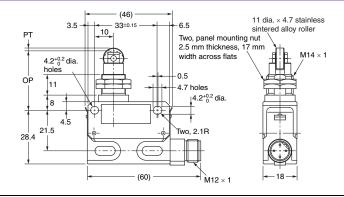

\* The position of the positioning Positioning piece is not always the same. If using an L-shaped connector causes problems in application, use a straight connector.

\*2. A 3-m lead wire cable equivalent to the 3-conductor VCTF S-FLEX cable (0.75 mm², 7 mm in dia.) is provided.

#### **Molded Terminal Models**

The molded-terminal model is available with right-hand and left-hand leads and is recommended for use where the Switch is exposed to dust, oil or moisture. It can be used like a screw-terminal model (with a cable), and the dimensions and operating characteristics are the same as for standard models.

#### Suffix by Location of Lead Outlet

Location of	Suffix for pre-wired terminal		
lead outlet	COM, NC, NO		
Right-hand	D4E-□□23N	(1)	
Left-hand	D4E-□□24N	(2)	

Example:

Standard type: D4E-1A20N Location of lead output: Right-hand → D4E-1A23N

#### **Lead Supplies**

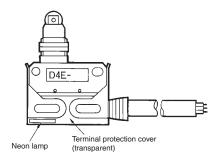

Specifications Leads	Nominal cross-sectional area (mm²)	External diameter	Terminal connections	Cable length (m)
V.C.T.F. S-FLEX	0.75	0.75 3 conductors Black: COM White: NO Red: NC	3 (Standard)	
(vinyl cabtire coat)	0.75			3 (Standard)

#### **Operation of Indicator-equipped Models**

- The molded terminal model may be equipped with an operation indicator (neon lamp or LED) upon request to facilitate maintenance and inspection.
- The operation indicator is designed to illuminate when the Switch is not operating. (Because of the molded terminal model, any change to the Switch wiring cannot be made.)

#### **AC Operation**

• The operating voltage is 90 to 250 VAC.

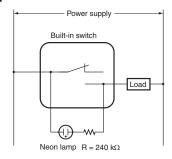

- There is no difference in operating characteristics between D4E □N AC Models and corresponding D4E-□N Standard Models.
- There is no difference in dimensions between D4E-□N AC Models and D4E-□N Standard Models.

#### Example:

Add "L" at the frond of "N", which is suffix of a part number.

Basic type: D4E-1A23N

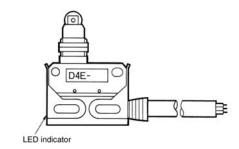

When placing your order for the molded terminal model with an neon lamp operation indicator, specify the model number as D4E-1A23LN. **Internal Circuit** 

#### DC Operation

- LED indicator is provided.
- As a rectifier stack is incorporated, into the unit and no directionality exists for connection of + and -, this type can also be operated on AC.
- Voltage ratings of LED indicators are as shown in the table below.

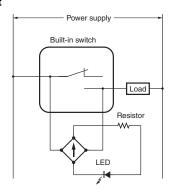

Туре	Voltage rating (V)	Leakage current (mA)	Internal resistance (kΩ)
L2	24	Approx. 1.2	18

#### Example:

Add "L2" at the frond of "N", which is suffix of a part number. Basic Model: The model number of the D4E-1A23N with a built-in 24-V LED indicator is D4E-1A23L2N.

#### Internal Circuit

### **Safety Precautions**

Refer to Safety Precautions for All Limit Switches.

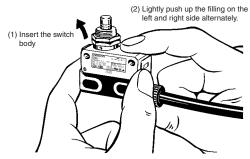

#### **Precautions for Correct Use**

#### **Operating Environment**

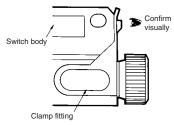

- Seal material may deteriorate if a Switch is used outdoor or where subject to special cutting oils, solvents, or chemicals. Always appraise performance under actual application conditions and set suitable maintenance and replacement periods.
- Install Switches where they will not be directly subject to cutting chips, dust, or dirt. The Actuator and Switch must also be protected from the accumulation of cutting chips or sludge.

- Constantly subjecting a Switch to vibration or shock can result in wear, which can lead to contact interference with contacts, operation failure, reduced durability, and other problems.
   Excessive vibration or shock can lead to false contact operation or damage. Install Switches in locations not subject to shock and vibration and in orientations that will not produce resonance.
- The Switches have physical contacts. Using them in environments containing silicon gas will result in the formation of silicon oxide (SiO<sub>2</sub>) due to arc energy. If silicon oxide accumulates on the contacts, contact interference can occur. If silicon oil, silicon filling agents, silicon cables, or other silicon products are present near the Switch, suppress arcing with contact protective circuits (surge killers) or remove the source of silicon gas.
- Do not solder the screw terminals.
- Sealing materials may deteriorate when used outdoors or when exposed to cutting oil, solvents, or chemicals. Check this on actual equipment and, if deterioration is foreseen, consult your OMRON representative in advance.
- If the one-touch connector is to be mounted onto the switch body, lightly push up the fitting so that the switch body can then be inserted into the clamp.

 Be sure that the clamp is inserted to the full depth, because the Switch will not function properly if one of the clamps is improperly inserted

• If the clamp is properly inserted up to the full depth, it will not slide out easily. Be sure to carefully confirm all the above items.

 Be sure to connect a fuse with a breaking current 1.5 to 2 times the rated current to the Limit Switch in series in order to protect the Limit Switch from damage due to short-circuiting. When using the Limit under the EN ratings, use a gl or gG 10-A fuse that conforms to IEC60269.

#### Mounting

 Secure the Switch with two M4 screws and washers. The tightening torque applied to each terminal must be 1.18 to 1.37 N·m. Tighten the screws to the specified torque. An excessive tightening torque may damage the Switch and cause a malfunction.

#### **Mounting Holes**

- When mounting the panel mount-type Switch with screws on a side surface, remove the hexagonal nuts from the actuator.
- When mounting the panel mount type on a panel, tighten the hexagonal nuts of the actuator to a torque less than 7.85 N·m.

#### **Mounting Hole**

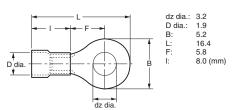

- Operating method, shape of cam or dog, operating frequency, and the overtravel (OT) have significant effect on the service life and precision of the Limit Switch. Make sure that the shape of the cam is smooth enough.
- $\bullet$  Check that OT has a sufficient margin. The actual OT should be rated OT  $\times\,0.7$  to 1.
- Do not change the operating position by remodeling the actuator.

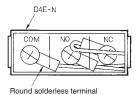

#### Wiring

When wiring screw terminals, M3-size round solderless terminals with an insulation tube is recommended. The conductor size should be 0.75 mm<sup>2</sup> and cable diameter should be 7 mm.

#### Round solderless terminals

#### Wiring Method (plunger model example)

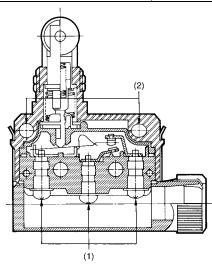

For the plunger and lever actuator models, the NC and NO terminal indicators are reversed.

#### **Tightening Torque**

A loose screw may result in a malfunction. Be sure to tighten each screw to the proper tightening torque as shown below.

No.	Туре	Appropriate tightening torque
(1)	Terminal screw (M3)	0.24 to 0.44 N·m
(2)	Switch mounting screw (M4)	1.18 to 1.37 N·m

#### Terms and Conditions Agreement

#### Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

#### Warranties.

- (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
- (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE

PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See <a href="http://www.omron.com/global/">http://www.omron.com/global/</a> or contact your Omron representative for published information.

#### Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

#### Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

#### Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

#### Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

#### Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions. Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

2024.3

In the interest of product improvement, specifications are subject to change without notice.
