

Sysmac Library for NJ/NX Machine Automation Controller

SYSMAC-XR009

Adept Robot Control Library

✓ **Control robots from the NJ/NX Machine Automation Controller.**

Issue 1 There is no time to learn a new robot programming language.

Issue 2 Controller data and robot data are backed up and managed separately.

Adept Robot Control Library offers solution!

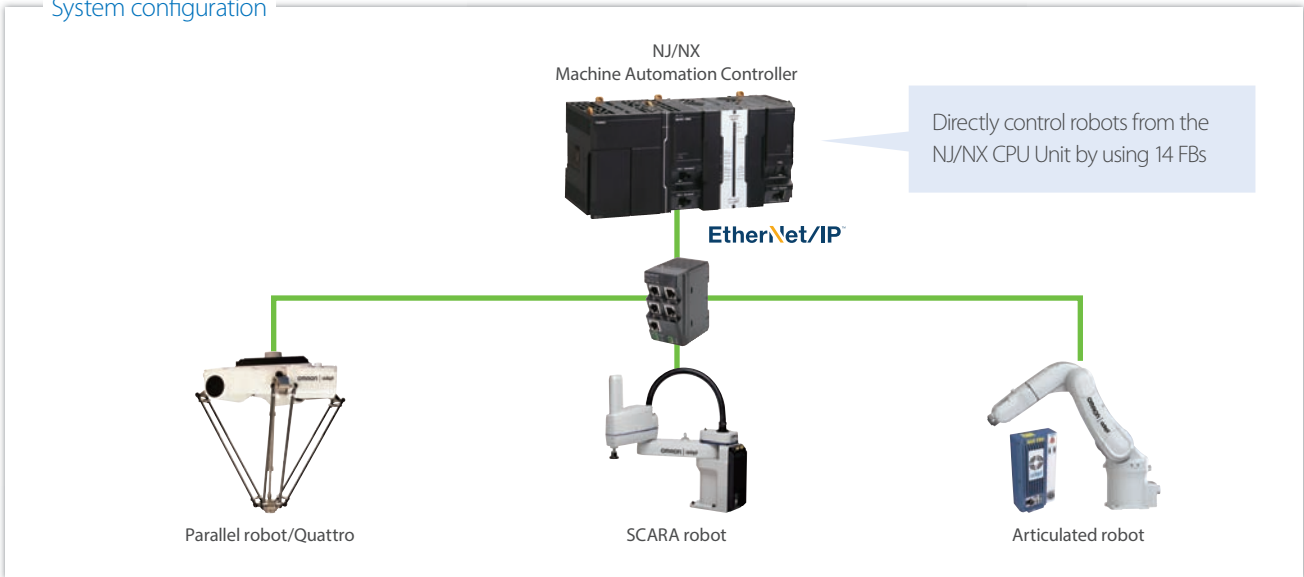

The Adept Robot Control Library allows parallel, SCARA, and articulated robots manufactured by Omron Adept Technologies Inc. to be controlled directly from the NJ/NX Machine Automation Controller by using the same instructions and programming method as the controller.

Function Blocks in this library enable robot control using Ladder and ST that are the programming languages used for the NJ/NX CPU Unit, eliminating the need to learn a new robot programming language.

The NJ/NX CPU Unit integrates robot system control and data management.

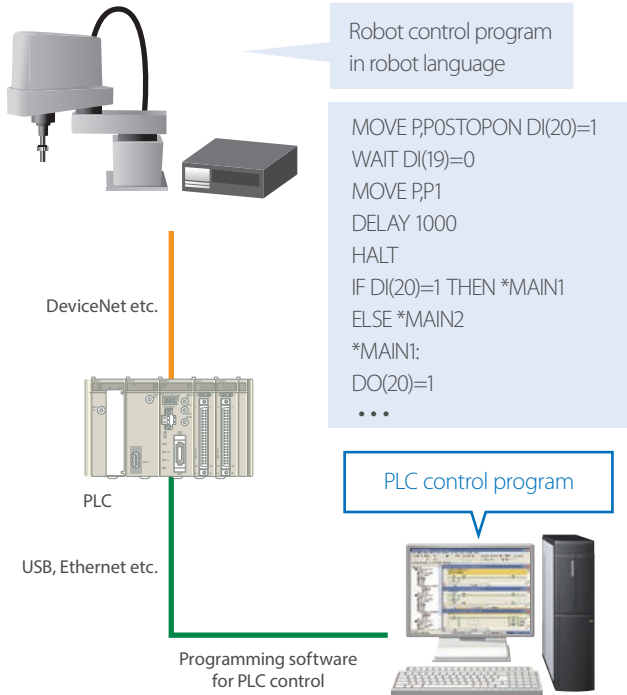

System configuration

Example of combination of controller and robot

From

Programming requires knowledge of controller and robot.

- Knowledge of both controller and robot
- I/O connection to network used for robot controller
- Separate programming and data backup

To

The same programming language is used for controller and robot control.

- Programming only for NJ/NX CPU Unit
- Integrated programming and data management for easy troubleshooting
