AUDIN

Amplifier Built-in Adjustable Range & Fixed-focus Reflective Photoelectric Sensor

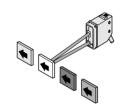

Detection of Different Color Objects at a Certain Distance

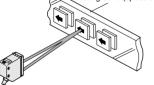

Not Affected by Color

The color or size of the object does not affect its sensing.

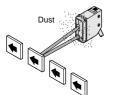

Not Affected by Background

The sensor does not detect the background beyond the set distance since it is distance settable type. Background (specular)

Insusceptible to Dust

The sensing performance is less affected by dust as it does not depend on the incident light intensity.

Waterproof

The sensor can be hosed down because of its IP67 construction. The equipment on which the sensor is mounted can be washed without any problem.

Note: However, take care that if it is exposed to water splashes during operation, it may detect a water drop itself.

Robust

Its robust enclosure is made of diecast zinc alloy.

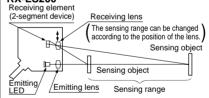

High-speed Response Time: 1ms

It can be used on a high speed assembly line.

Principle of Optical Sensing

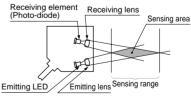

Adjustable Range & Fixed-focus Reflective Type The sensing range for which the sensor detects an object is determined by the incident beam angle, regardless of the incident light intensity.

RX-LS200

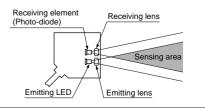

Convergent Reflective Type

The sensor detects an object only in the overlapping area of the emitting and receiving envelopes. The detectability is a little influenced by the reflectivity of the object surface.

Diffuse Reflective Type

The sensing range changes with the reflectivity and size of the sensing object.

APPLICATIONS

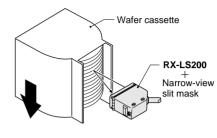

Detecting lids of cups

Safekeeping at parking garage

Wafer counting in cassette

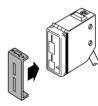

ORDER GUIDE

Appearance	Sensing range	Model No.	Output
	50 to 200mm	RX-LS200	NPN open-collector transistor
	50 to 200mm	RX-LS200-P	PNP open-collector transistor

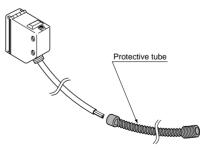

OPTIONS

Designation	Model No.	Description		
	OS-RXL-1	Slit size	2.5×24mm	The sensing view is nar- rowed laterally so that the effect of the object's sur- roundings is reduced.
Narrow-view slit mask	OS-RXL-2		3.0×24mm	
	OS-RXL-3		3.5×24mm	
Protective tube	PT-RX500	Length	500mm	Cable is protected from external forces.
	PT-RX1000		1,000mm	It does not rust as it is made of stainless steel.

Narrow-view slit mask

Protective tube

SPECIFICATIONS

-		Adjustable range & fixed-focus reflective					
	Туре	NPN output type	PNP output type				
Ite	m Model No.	RX-LS200	RX-LS200-P				
Se	nsing range	50 to 200mm with white no	n-glossy paper (50 $ imes$ 50mm)				
Hy	steresis	10% or less of operation distance					
Re	peatability	Along sensing axis: 1mm or less, Perpendicular to sensing axis: 0.5mm or less					
Supply voltage		12 to 24V DC ± 10% Ripple P-P 10% or less					
Cur	rrent consumption	40mA or less					
Ou	tput	NPN open-collector transistor • Maximum sink current: 100mA • Applied voltage: 30V DC or less (between output and 0V) • Residual voltage: 1.5V or less (at 100mA sink current) 0.4V or less (at 16mA sink current)	PNP open-collector transistor • Maximum source current: 100mA • Applied voltage: 30V DC or less (between output and + V • Residual voltage: 1V or less (at 100mA source current) 0.4V or less (at 16mA source current)				
	Utilization category	DC-12 or DC-13					
	Output operation	Switchable either Light-ON or Dark-ON					
	Short-circuit protection	Incorporated					
Re	sponse time	1ms or less					
Operation indicator Stability indicator		Red LED (lights up when the output is ON)					
		Green LED (lights up under stable light received condition or stable dark condition)					
Dis	stance adjuster	2-turn mechanical adjuster					
	Pollution degree	3 (Industrial	environment)				
	Protection	IP67 (IEC)					
nce	Ambient temperature	-25 to $+60^{\circ}$ C (No dew condensation or icing allowed), Storage: -30 to $+70^{\circ}$ C					
resistance	Ambient humidity	35 to 85% RH, Storage: 35 to 85% RH					
	Ambient illuminance	Sunlight: 11,000 ℓ x at the light-receiving face, Incandescent light: 3,500 ℓ x at the light-receiving face					
Environmental	EMC	Emission: EN50081-2, Immunity: EN50082-2					
iron	Voltage withstandability	1,000V AC for one min. between all supply terminals connected together and enclosure					
Б С	Insulation resistance	$20M\Omega$, or more, with 250V DC megger between all supply terminals connected together and enclosure					
	Vibration resistance	10 to 500Hz frequency, 1.5mm amplitude (10G max.) in X, Y and Z directions for two hours each					
	Shock resistance	Shock resistance 500m/s ² acceleration (approx. 50G) in X, Y and Z directions for three times ea					
Emitting element		Infrared LED (modulated)					
Material		Enclosure: Die-cast zinc alloy, Indicator cover: Polyethersulphone, Lens: Polycarbonate					
Ca	ble	0.15mm ² 3-core oil, heat and cold resistant cabtyre cable, 3m long					
Ca	ble extension	Extension up to total 100m is possible with 0.3mm ² , or more, cable.					
Weight Accessories		85g approx.					
		MS-RX-1 (Sensor mounting bracket): 1 set, Adjusting screwdriver: 1 No.

SENSING CHARACTERISTICS (TYPICAL)

Correlation between sensing object size and sensing range

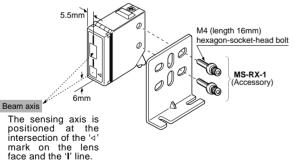

PRECAUTIONS FOR PROPER USE

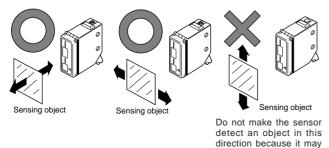

This product is not a safety sensor. Its use is not intended or designed to protect life and prevent body injury or property damage from dangerous parts of machinery. It is a normal object detection sensor.

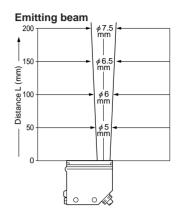

Mounting

• The tightening torque should be 1.17N·m or less.

· Care must be taken regarding the sensor mounting direction with respect to the object's direction of movement.

Refer to P.820~ for general precautions.

- · When detecting a specular object (aluminum or copper foil) or an object having a glossy surface or coating, please take care that there are cases when the object may not be detected due to a small change in angle, wrinkles on the object surface, etc.
- When a specular body is present below the sensor, use the sensor by tilting it slightly upwards to avoid wrong operation.
- If a specular body is present in the background, wrong operation may be caused due to a small change in the angle of the background body. In that case, install the sensor at an inclination and confirm the operation with the actual sensing object.
- Do not install the sensor at a distance of less than 50mm from the object because the sensing is unstable in this range.

Wiring

 The output of RX-LS200-P is not incorporated with a short-circuit protection circuit. Do not connect it directly to a power supply or a capacitive load.

Others

• Do not use during the initial transient time (50ms) after the power supply is switched on.

PRECAUTIONS FOR PROPER USE

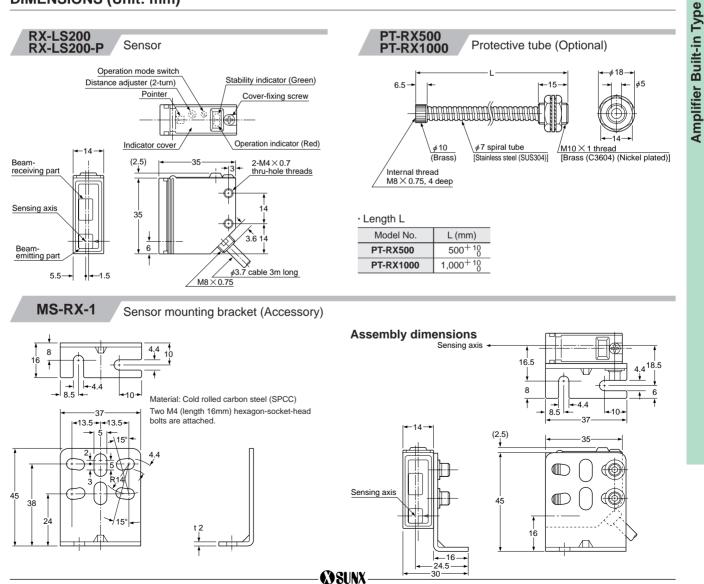

Distance adjustment <Adjusters>

<Adjusting procedure>

Step	Description	Distance adjuster
1	Turn the distance adjuster fully counterclockwise to the minimum sensing range position (50mm approx.). (Do not turn excessively.)	Turn
2	Place an object at the required distance from the sensor, turn the distance adjuster gradually clockwise, and find out point '((a)') where the sensor changes to the light received condition.	
3	Remove the object, turn the distance adjuster fur- ther clockwise, and find out point '®' where the sensor changes to the light received condition again with only the background. When the sensor does not go to the light received condition even if the adjuster is fully turned clockwise, point '®' is this extreme point.	B C C C
4	The optimum position to stably detect objects is the center point between '(A)' and '(B)'.	B Coptimum position
