WE KEEP THE WORLD IN MOTION

Committed to become your world class partner, Bonfiglioli is a leading name in power transmission since 1956.

Our best-in-class solutions are backed by nearly 60 years of engineering expertise as well as an in-depth understanding of the industries we serve.

High innovative mechatronic tailored solutions from unique supplier to meet any kind of specific needs.

MECHATRONICS - THE CHALLENGE TO BUILD YOUR SUCCESS

Faster, better and cheaper - this is the new challenge for machine designers!

Increasing demands on the productivity of complex system machines, more flexible machines which run at highest efficiency level are requiring now new intelligent technical solutions that enhance growth tomorrow. Bonfiglioli has implemented a precise and detailed strategy to precisely achieve this objective!

Committed to be your world class partner of smart mechatronic solutions and servosystems, the Industrial Business Unit has established two divisions to serve its reference markets with specialist competence and care:

- Power Transmission Solutions division (PTS)
- Mechatronic Drives & Solutions division (MDS)

Our new Mechatronic Drives & Solutions (MDS) division is born with the mission to improve profitability by acting as a riskless partner and a provider of energy-efficient solutions over the total life cycle in the field of industrial automation.

- System integration
- Expertise
- Energy saving

Performance, reliability, low cost, robustness, efficiency and sustainability are absolutely essential.

OUR EXPERTISE FROM START TO FINISH!

Two Centers of Excellence are driving MDS' innovation:

- Bonfiglioli Vectron in Germany, with strong technical, R&D and manufacturing capabilities as regards electronic components, and most notably inverters and servo drives;
- BMR (Bonfiglioli Mechatronic Research), situated in Rovereto (Trento, Italy) who offers a strong R&D capability able to provide innovative new solution for your specific needs. BMR is also a production facility where mechatronic new solutions become reality.

Key to our MDS' success is strongest technical support from our specialists DSC (Drive Service Center team). They accompany you throughout the entire installation's life cycle, from initial concept idea and design until commissioning.

Bonfiglioli

is close to your needs internationally through its branches which can directly follow the customers using streamlined international teams.

ONE STOP SHOP FOR YOUR MECHATRONIC APPLICATIONS

As a competent technology partner, our engineering specialist are **building together with you tailored and forward looking integrated solutions to meet the individual needs and to deliver mechatronic energy-efficient for your application.**

Bonfiglioli Servopackage is including all the components required for a complete automation solution in one coordinating product package:

- HMI – Bonfiglioli Human Machine Interface
- Programmable controller (ACU / ACT / AGL)
- Highly dynamic servomotors with various feedback devices BMD serie
- Precision Planetary Gearboxes (TQ, TQK, TR; MP; LC; LCK; SL, KR)
- “Ready - to - use” accessories (cables, chokes, filters ecc)

Your benefit:

- Highest Precision & Dynamic
- High Input Speed Application
- Frequent Reverse cycle
- Highest Power Density
- Smooth running

Your benefit:

- High Precision & Dynamic
- Frequent Reverse Cycle
- Highest Power Density

Your benefit:

- Energy Saving
- Simplified System Solution
- Wide Constant torque
- Accurate four Quadrant Torque & Velocity Control
- Highest Power Density

Complete automation Servo Package from unique supplier!

We are able to optimize the servopackage avoiding over sizing that increases the initial system cost as well as the ongoing operating cost of a servo system.

The screenshot displays the Pick and Place software interface, version 3.2.569 DGL Pro. The main window shows a 3D model of a belt and pulley system, labeled "Axis 1: Sistema B asse Z - Belt and Pulley". The model includes a motor, a pulley, and a belt. The status bar indicates "v3.2.569 DGL Pro".

Below the 3D model, there is a graph showing the sequence of operations. The graph plots time (s) on the x-axis (from 0.0 to 1.0) and distance (m) on the y-axis (from 0.0 to 1.0). The graph shows a red line representing the sequence and a blue line representing the distance. The sequence starts at 0.0s, moves to 0.5s, then to 1.0s, and finally to 0.0s.

To the right of the graph, there is a table showing the sequence of operations. The table has columns for "No.", "Description", "Time (s)", "Distance (m)", "Start (s)", "End (s)", "Speed (mm/s)", "Acceleration (mm/s²)", "Deceleration (mm/s²)", and "Total (s)".

No.	Description	Time (s)	Distance (m)	Start (s)	End (s)	Speed (mm/s)	Acceleration (mm/s²)	Deceleration (mm/s²)	Total (s)
1	Axis Z - Sistema B asse Z	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0
2	Axis Z - Sistema B asse Z	0.5	0.5	0.0	0.5	0.0	0.0	0.0	0.5
3	Axis Z - Sistema B asse Z	1.0	1.0	0.5	1.0	0.0	0.0	0.0	1.0
4	Axis Z - Sistema B asse Z	0.0	0.0	1.0	0.0	0.0	0.0	0.0	0.0
5	Axis Z - Sistema B asse Z	0.5	0.5	0.0	0.5	0.0	0.0	0.0	0.5
6	Axis Z - Sistema B asse Z	1.0	1.0	0.5	1.0	0.0	0.0	0.0	1.0
7	Axis Z - Sistema B asse Z	0.0	0.0	1.0	0.0	0.0	0.0	0.0	0.0

Below the table, there is a section for "Sequence" with buttons for "OK", "Apply", and "Cancel".

On the right side of the interface, there is a "Sequence" window showing a 3D model of the belt and pulley system. The model includes a motor, a pulley, and a belt. The status bar indicates "v3.2.569 DGL Pro".

Below the 3D model, there is a table showing the sequence of operations. The table has columns for "No.", "Description", "Time (s)", "Distance (m)", "Start (s)", "End (s)", "Speed (mm/s)", "Acceleration (mm/s²)", "Deceleration (mm/s²)", and "Total (s)".

No.	Description	Time (s)	Distance (m)	Start (s)	End (s)	Speed (mm/s)	Acceleration (mm/s²)	Deceleration (mm/s²)	Total (s)
1	Axis Z - Sistema B asse Z	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0
2	Axis Z - Sistema B asse Z	0.5	0.5	0.0	0.5	0.0	0.0	0.0	0.5
3	Axis Z - Sistema B asse Z	1.0	1.0	0.5	1.0	0.0	0.0	0.0	1.0
4	Axis Z - Sistema B asse Z	0.0	0.0	1.0	0.0	0.0	0.0	0.0	0.0
5	Axis Z - Sistema B asse Z	0.5	0.5	0.0	0.5	0.0	0.0	0.0	0.5
6	Axis Z - Sistema B asse Z	1.0	1.0	0.5	1.0	0.0	0.0	0.0	1.0
7	Axis Z - Sistema B asse Z	0.0	0.0	1.0	0.0	0.0	0.0	0.0	0.0

Below the table, there is a section for "Sequence" with buttons for "OK", "Apply", and "Cancel".

On the right side of the interface, there is a "Sequence" window showing a 3D model of the belt and pulley system. The model includes a motor, a pulley, and a belt. The status bar indicates "v3.2.569 DGL Pro".

Below the 3D model, there is a table showing the sequence of operations. The table has columns for "No.", "Description", "Time (s)", "Distance (m)", "Start (s)", "End (s)", "Speed (mm/s)", "Acceleration (mm/s²)", "Deceleration (mm/s²)", and "Total (s)".

No.	Description	Time (s)	Distance (m)	Start (s)	End (s)	Speed (mm/s)	Acceleration (mm/s²)	Deceleration (mm/s²)	Total (s)

ENERGY COST MODEL TO ALLOW THE SERVO OPTIMIZATION

Most modern day servosystems are designed to be electrically coupled to share energy, minimize unused or oversized components, and reduce both initial hardware cost as well as operating costs by improved energy efficiency.

As energy prices continue to increase, energy efficiency has become a primary design objective, since energy costs can account for **95% of the life cost of a servo system**.

Bonfiglioli optimize efficiency of entire drive trains by a detailed analysis identifying and assessing potentials for saving energy.

The screenshot shows the 'System Supply Power' software interface with the 'Details' tab selected. The table displays energy and power data for two systems, 'Sistema B asse Z' and 'Sistema B asse Y'. A magnifying glass highlights the 'Gearbox' section for 'Sistema B asse Z'.

	Units	Sistema B asse Z	Sistema B asse Y
Energy: \$ 129,12/year			
Output peak power	W	444	304,6
Regen cont power	W	0	18,42
Regen peak power	W	0	256,8
Energy	kWh/year	36,90	41,9
Energy cost	\$/year	36,90	4,19
T1			
		Gearbox	
Output cont power	W	62,2	21,08
Output peak power	W	428	293,5
Regen cont power	W	0	19,03

Regen cont power	W	0	19,03
Regen peak power	W	0	264,9
Energy	kWh/year	54,33	17,96
Energy cost	\$/year	54,33	1,80
Total			
Energy	kWh/year	99,20	236,2
Energy cost	\$/year	99,20	23,62

Which is the energy distribution across the entire cinematic chain / axis?

Which is the potential to optimize the application in term of energy saving?

A RELIABLE PARTNER FOR YOUR BUSINESS

Bonfiglioli Riduttori brings decades of experience supporting customers across a broad spectrum industry sectors.

Our industry expertise means we understand your applications: product and requirements must fit and form a solution that match to your application.

Our tailored-solution always offer to you a complete approach.

Some of the industrial sectors we serve:

- Commercial HVAC
- Machine Tools
- Packaging & Labeling
- Food, Beverage & Tobacco
- Textiles
- Glass working
- Robotics
- Materials Handling
- Rubber & Plastics
- Paper & Paperboard
- Conveyors
- Electronics & Electronic Assembly
- Cranes and Hoists
- Woodworking
- Energy Production
- Renewable Energy
- Material Transformation
- Mining
- Elevators

And many more besides

ONE-STOP SHOP OUR SERVICES

All Bonfiglioli solutions enjoy a prompt and reliable technical assistance worldwide.

Specialist personnel with an in-depth knowledge of the market in which they work provide pre-sales, installation, after-sales and user documentation service.

In details, we offer a full range of services tailored to suit our customers wishes and needs.

- Optimal delivery times for your products & very fast deliveries for unplanned requests with urgent procedure.
- Immediate professional technical support able to define customized solutions.
- Fast response time & delivery for your units to replace in case of time-critical situations.

SERVO GEARHEADS

Motion applications requires the use of planetary gearboxes to adapt speeds and torques, while ensuring precision demanded by the application.

Bonfiglioli Riduttori has chosen to use planetary precision gearboxes with BMD range of permanent magnet synchronous motors.

These gearheads combined with powerful drive electronics are designed for servo applications requiring highest standards in terms of dynamics, precision, robustness, durability and long operation.

An important requirement for automation applications is high torque capability in a compact and light package. This high torque density requirement (a high torque/volume or torque/weight ratio) is important for automation applications with changing high dynamic loads in order to avoid additional system inertia.

1 GENERAL INFORMATION

1.1 SYMBOLS, UNITS AND DEFINITIONS

Values depending on the **APPLICATION**

term	u.m.	definition
A₂	[N]	Axial force on output shaft
A₂ EQU	[N]	Equivalent axial force applying on output shaft
A₂ MAX	[N]	Maximum axial force applying on output shaft
R₂	[N]	Radial force on output shaft
R₂ EQU	[N]	Equivalent radial force applying on output shaft
R₂ MAX	[N]	Maximum radial force applying on output shaft
ED	[min]	Duration of the duty
ED%	[%]	Cyclic duration factor
L_{10h} TARGET	[h]	Output shaft bearings' desired basic rating life
M₁ PEAK	[Nm]	Maximum input torque (limited by motor control)
M_{2(1) ... M_{2(n)}}	[Nm]	Output torque at the times t ₁ ... t _n
M₂ EQU	[Nm]	Equivalent output torque
M₂ MAX	[Nm]	Maximum output torque in case of emergency
M_{T2} EQU	[Nm]	Equivalent tilting moment applying on output shaft
M_{T2} MAX	[Nm]	Maximum tilting moment applying on output shaft
n₁	[min ⁻¹]	Nominal input speed
n₂	[min ⁻¹]	Output speed
n_{2(1) ... n_{2(n)}}	[min ⁻¹]	Output speed based on the times t ₁ ... t _n
n₂ EQU	[min ⁻¹]	Equivalent output speed
n₂ MAX	[min ⁻¹]	Maximum output speed
T	[C°]	Ambient temperature
t₁ ... t_n	[s]	Operating time
t_Σ	[s]	Cycle duration including pause
Z	[1/h]	Number of cycles per hour

Values depending on the **GEAR DRIVE SELECTION**

term	u.m.	definition
$A_{2\ 3\ max}$	[N]	Admissible axial force on output shaft
$A_{2'\ max}$	[N]	Axial force acting simultaneously with radial force
$R_{1\ max}$	[N]	Admissible radial force at midpoint of input shaft
$R_{2\ 3\ max}$	[N]	Admissible radial force at midpoint of output shaft
C_B	[Nm]	Constant for bearing's lifetime calculation
C_t	$\left[\frac{Nm}{arcmin} \right]$	Torsional stiffness
f_n	—	Speed factor
f_z	—	Cycle factor
f_T	—	Temperature adjusting factor
i	—	Gearbox ratio
J_G	[kgcm ²]	Mass moment of inertia of the gearhead
K_n	—	Speed constant
L_{10h}	[h]	Bearings basic rating life
L_z	[mm]	Factor for bearing lifetime calculation
$M_{a\ 2}$	[Nm]	Maximum acceleration output torque
$M_{n\ 2}$	[Nm]	Rated output torque
$M_{p\ 2}$	[Nm]	Emergency stop output torque. Permitted 1000 times during service life of the gearbox
$M_{T2\ max}$	[Nm]	Maximum tilting moment applying on output shaft
$n_{1\ max}$	[min ⁻¹]	Maximum momentary input speed. The speed the unit can be driven at occasionally and in non-repetitive conditions For duty type S5, it cannot be applied continuously for more than 30 seconds
p	—	Bearing lifetime exponent
η	[%]	Gear efficiency
φ_R	[arcmin]	Reduced backlash is calculated in static conditions and with the application of a torque equal to 2% of the gear unit rated torque
φ_S	[arcmin]	Standard backlash is calculated in static conditions and with the application of a torque equal to 2% of the gear unit rated torque

1.2 SELECTING THE GEAR UNIT

(a)	Ratio	i	—	$i = \frac{n_1}{n_2}$
(b)	Equivalent output torque	$M_{2\text{ EQU}}$	[Nm]	$M_{2\text{ EQU}} = \sqrt[3]{\frac{ n_{2(1)} \cdot t_1 \cdot M_{2(1)} ^3 + \dots + n_{2(n)} \cdot t_n \cdot M_{2(n)} ^3}{ n_{2(1)} \cdot t_1 + \dots + n_{2(n)} \cdot t_n}}$
(c)	Equivalent output speed	$n_{2\text{ EQU}}$	[min ⁻¹]	$n_{2\text{ EQU}} = \frac{ n_{2(1)} \cdot t_1 + n_{2(2)} \cdot t_2 + \dots + n_{2(n)} \cdot t_n}{t_\Sigma}$
(d)	Speed factor	f_n	—	If $\frac{K_n}{n_{2\text{ EQU}} \cdot i} \geq 1 \Rightarrow f_n = 1$ If $\frac{K_n}{n_{2\text{ EQU}} \cdot i} < 1 \Rightarrow f_n = \text{Obtain from diagram}$
(e)	Temperature adjusting factor	f_T	—	
(f)	Cyclic duration factor	ED%	[%]	$ED\% = \frac{t_1 + t_2 + \dots + t_n}{t_\Sigma} \cdot 100$
	Duration of the duty	ED	[min]	$ED = t_1 + t_2 + \dots + t_n$
(g)	Number of cycles per hour	Z	[1/h]	$Z = \frac{3600}{t_\Sigma}$
(h)	Cycle factor*	f_z	—	 *For Z>6000 please contact us!
(i)	Maximum input torque	$M_{1\text{ PEAK}}$	[Nm]	a) maximum possible application torque b) limited motor torque by inverter c) maximum motor torque

TQ

PLANETARY PRECISION INLINE GEARBOX

TQ

TQ features a higher positioning. Whether torque, robustness, or precision - this attractive product range scores in every category.

Product Line Up:

- Outstanding Torque Density
- Outstanding Acceleration and Nominal Torques
- Outstanding Radial and Axial loading capacities
- Designed for Cyclic and Continuous duty
- Markedly higher Torsional Stiffness
- Extremely Geometrical Backlash less than 2 arcmin
- Quiet running
- Universal design allow any mounting orientation

2 FEATURES OF TQ SERIES

Low backlash planetary drives of TQ series combine outstanding performances with a distinctive Italian style which makes them immediately recognizable amongst similar products within the reference industry.

Their design and construction has been developed with the goal of offering consumers a line of products which feature absolute and consistent Quality, which in turn provides a competitive advantage for machines and systems that adopt them as transmission devices.

- TQ features two classes of precision, corresponding to the following values of circumferential backlash
1-stage units: standard $\varphi_s \leq 3'$ reduced $\varphi_R \leq 2'$ ($\varphi_s \leq 4'$; $\varphi_R \leq 2'$ for TQ 060 and TQ 070)
2-stage units: standard $\varphi_s \leq 5'$ reduced $\varphi_R \leq 3'$ ($\varphi_s \leq 6'$; $\varphi_R \leq 4'$ for TQ 060 and TQ 070)
- A high IP rating (IP65) provides inner parts with protection against the ingress of dust and liquids.
- Input section oil seals made from a Fluoroelastomer compound are supplied as standard.
- Noise pressure level $60 \leq L_p \leq 70$ dB(A). Conditions: distance 1 m ; measured without load and an input speed of $n_1 = 3000 \text{ min}^{-1}$; $i = 10$.
- Numerous adapters allow matching the most popular brands of servomotors.
- Lubrication optimized for the type of duty specified when ordering.
In the absence of contamination the lubricant requires no periodical changes.

duty	TQ 060 ... TQ 160	other seals
S1 (continuous)	Synthetic oil viscosity ISO VG 220	Fluoroelastomer
S5 (intermittent)	NLGI grease consistency 00	NBR

- Ambient temperature min -20°C , max $+30^\circ\text{C}$. For temperature higher than 30°C please consider derating factor f_T .
- Housing temperature must not exceed $T_{\text{max}} = 90^\circ\text{C}$.

PLANETARY PRECISION RIGHT ANGLE GEARBOX

TQK angular gearbox features a higher positioning like TQ inline serie.

This exceptional gearbox is the solution to space problems often posed by increasingly compact machines.

Whether torque, robustness, or precision - this attractive product range scores in every category.

TQK

Product Line Up:

- Outstanding Torque Density
- Outstanding Acceleration and Nominal Torques
- Outstanding Radial and Axial loading capacities
- Designed for Cyclic and continuous duty
- Markedly higher Torsional Stiffness
- Extremely Geometrical Backlash less than 3 arcmin
- Quiet running
- Universal design allow any mounting orientation

3 FEATURES OF TQK SERIES

Low backlash bevel-planetary drives of the TQK series are the solution to space problems often posed by increasingly compact machines. TQK drives combine high levels of dynamic operation with top precision, which results in great accuracy and repeatability for any positioning mechanism in which they are installed.

On top of their robustness and dependability TQK drives also feature a distinctive Italian style that makes them clearly recognizable amongst like products within the reference industry.

- TQK features two classes of precision, corresponding to the following values of circumferential backlash
2-stage units: standard $\varphi_S \leq 5'$; reduced $\varphi_R \leq 4'$ ($\varphi_S \leq 6'$; $\varphi_R \leq 5'$ for TQK 060 and TQK 070)
3-stage units: standard $\varphi_S \leq 7'$; reduced $\varphi_R \leq 6'$ ($\varphi_S \leq 8'$; $\varphi_R \leq 7'$ for TQK 060 and TQK 070)
- A high IP rating (IP65) provides inner parts with protection against the ingress of dust and liquids.
- Input section oil seals made from a Fluoroelastomer compound are supplied as standard.
- Noise pressure level $60 \leq L_p \leq 70$ dB(A). Conditions: distance 1 m ; measured without load and an input speed of $n_1 = 3000 \text{ min}^{-1}$; $i = 10$.
- Numerous adapters allow matching the most popular brands of servomotors.
- Lubrication optimized for the type of duty specified when ordering, in the absence of contamination the lubricant requires no periodical changes.

duty	TQK 060 ... TQK 160	other seals
S1 (continuous)	Synthetic oil viscosity ISO VG 220	Fluoroelastomer
S5 (intermittent)	NLGI grease consistency 00	NBR

- Ambient temperature min -20°C , max $+30^\circ\text{C}$. For temperature higher than 30°C please consider derating factor f_T .
- Housing temperature must not exceed $T_{\text{max}} = 90^\circ\text{C}$.

TR

PLANETARY PRECISION GEARBOX

TR planetary precision gearboxes are landmark for extremely reduced backlash, optimal performance, silent operation and facilitated motor assembly along with top reliability.

Available in different configuration (with input right angle; with output right angle and hollow shaft; with solid input shaft), and servo-adapters to comply with most servomotors mechanical interface from the market.

TR

Product Line Up:

- Higher Torque Density
- Higher Acceleration and Nominal Torques
- Higher Radial and Axial loading capacities
- Designed for Cyclic and continuous duty
- Higher Torsional Stiffness
- Higher precision due to geometrical backlash less than 3 arcmin
- Quiet running
- Highest flexibility (low / reduced backlash; standard / reinforced bearings; different constructive version) to match with your specific requirement.

4 FEATURES OF TR SERIES

Planetary gear units of the TR series belong to a range of low backlash drives very broad and complete as far as transmissible torque, gear ratios and circumferential backlash.

All units are generously proportioned to run quietly and provide a long service life without maintenance requirements.

Motor mounting is an operation that can be easily conducted without the need of any particular tooling, other than that usually available in a normally equipped workshop.

- Available with either standard (STD) or reduced (LOW) backlash:
 1-stage units: standard $\Phi_s \leq 5'$; reduced $\Phi_R \leq 3'$
 2-stage units: standard $\Phi_s \leq 5'$; reduced $\Phi_R \leq 3'$
 3-stage units (G and MB only): standard $\Phi_R \leq 5'$; reduced $\Phi_R \leq 3'$
 3-stage units: standard $\Phi_s \leq 7'$; reduced $\Phi_R \leq 5'$
 4-stage units (G and MB only): standard $\Phi_s \leq 7'$; reduced $\Phi_R \leq 5'$
- A high IP rating (IP65) provides inner parts with protection against the ingress of dust and liquids.
- Input section oil seals made from a Fluoroelastomer compound are supplied as standard.
- Noise pressure level $L_P \leq 70$ dB(A). Conditions: distance 1 m; measured without load an input speed of $n_1 = 3000 \text{ min}^{-1}$; $i=10$.
- Bearings suitably rated for an average service life of 20,000 hours under nominal operating conditions. The following chart shows the types of bearings for the output shaft.

	TR 053	TR 060	TR 080	TR 105	TR 130	TR 160	TR 190
SB							

- Wide range of adapter flanges matching the most popular brands of motors.

- Lubrication optimized for the type of duty specified when ordering.
In the absence of contamination the lubricant requires no periodical changes.

duty	TR 053 - TR 060	TR 080 ... TR 190	oil seals
S1 (continuous)	NLGI grease consistency 00	Synthetic oil viscosity ISO VG 220	Fluoroelastomer
S5 (intermittent)		NLGI grease consistency 00	NBR

- Ambient temperature min -20°C, max +30°C. For temperature higher than 30°C please consider derating factor f_t .
- Housing temperature must not exceed $T_{max} = 90^\circ\text{C}$.

4.3.1 MACHINE SHAFT

Pivot of driven equipment should be made from high grade alloy steel. Table below shows recommended dimensions for the Customer to consider when designing mating shaft. A device retaining the shaft axially is also recommended (not shown). The number and size of relative tapped holes at shaft end depend on application requirements.

MB

MP

PLANETARY PRECISION GEARBOX

MP planetary precision gearboxes are landmark for optimal performance, along with top reliability.

Available in different configuration (with input right angle; with output right angle; and hollow shaft, with solid input shaft), and servo-adapters to comply with most servomotors mechanical interface from the market.

MP

Product Line Up:

- Higher Torque Density
- Higher Acceleration and Nominal Torques
- Higher Radial and Axial loading capacities
- Designed for Cyclic and continuous duty
- Higher Torsional Stiffness
- Geometrical Backlash less than 10 arcmin
- Highest flexibility (low / reduced backlash; standard / reinforced bearings; different constructive version) to match with your specific requirement.

5 FEATURES OF MP SERIES

Planetary gear units of the MP series belong to a range of low backlash drives very broad and complete as far as transmissible torque, gear ratios and circumferential backlash.

All units are generously proportioned to run quietly and provide a long service life without maintenance requirements.

Motor mounting is an operation that can be easily conducted without the need of any particular tooling, other than that usually available in a normally equipped workshop.

- Available with either standard (STD) or reduced (LOW) backlash:
 1-stage units: standard $s \leq 15'$; reduced $R \leq 10'$
 2-stage units: standard $s \leq 15'$; reduced $R \leq 10'$
 3-stage units (G and MB only): standard $R \leq 15'$; reduced $R \leq 10'$
 3-stage units: standard $s \leq 17'$; reduced $R \leq 12'$
 4-stage units (G and MB only): standard $s \leq 17'$; reduced $R \leq 12'$
- A high IP rating (IP65) provides inner parts with protection against the ingress of dust and liquids.
- Input section oil seals made from a Fluoroelastomer compound are supplied as standard.
- Noise pressure level $L_P \leq 70$ dB(A). Conditions: distance 1 m; measured without load an input speed of $n_1 = 3000 \text{ min}^{-1}$; $i=10$.
- Bearings suitably rated for an average service life of 20,000 hours under nominal operating conditions. The following chart shows the types of bearings for the output shaft.

	MP 053	MP 060	MP 080	MP 105	MP 130	MP 160	MP 190
SB							
HB							

Output shaft max. loading capacity

- Wide range of adapter flanges matching the most popular brands of motors.

- Lubrication optimized for the type of duty specified when ordering.
In the absence of contamination the lubricant requires no periodical changes.

duty	MP 053 - MP 060	MP 080 ... MP 190	oil seals
S1 (continuous)	NLGI grease consistency 00	Synthetic oil viscosity ISO VG 220	Fluoroelastomer
S5 (intermittent)		NLGI grease consistency 00	NBR

- Ambient temperature min -20°C, max +30°C. For temperature higher than 30°C please consider derating factor ft.
- Housing temperature must not exceed $T_{max} = 90^{\circ}\text{C}$.

Technical drawing of a square plate with the following dimensions and features:

- Overall width: 95
- Overall height: 125 (62.5 + 62.5)
- Inner square section width: 80
- Inner square section height: 125
- Distance from bottom edge to inner square section: 22.5
- Distance from top edge to inner square section: 27.5
- Four holes are located at the corners of the inner square section.
- One hole is dimensioned as $M8$.

5.3.1 MACHINE SHAFT

Pivot of driven equipment should be made from high grade alloy steel. Table below shows recommended dimensions for the Customer to consider when designing mating shaft. A device retaining the shaft axially is also recommended (not shown). The number and size of relative tapped holes at shaft end depend on application requirements.

MB

LC

PLANETARY PRECISION GEARBOX IN LINE

LC planetary precision gearboxes represent a flexible solution, and economic alternative together with an optimal performance and reliability.

LC

Product Line Up:

- Optimal Torque Density
- Optimal Acceleration and Nominal Torques
- Optimal Radial and Axial loading capacities
- Designed for Cyclic and Continuous duty
- Optimal Torsional Stiffness
- Geometrical Backlash less than 6 arcmin
- Universal design allow any mounting orientation

6 FEATURES OF LC SERIES

Planetary gear units of the LC series belong to a range of low backlash drives very broad and complete as far as transmissible torque, gear ratios and circumferential backlash.

All units are generously proportioned to run quietly and provide a long service life without maintenance requirements.

Motor mounting is an operation that can be easily conducted without the need of any particular tooling, other than that usually available in a normally equipped workshop.

- Available with either standard (STD) or reduced (LOW) backlash:
1-stage units: standard $\varphi_S \leq 12'$; reduced $\varphi_R \leq 6'$
2-stage units: standard $\varphi_S \leq 15'$; reduced $\varphi_R \leq 8'$
- A high IP rating (IP64) provides inner parts with protection against the ingress of dust and liquids.
- Input section oil seals made from a Fluoroelastomer compound are supplied as standard.
- Noise pressure level $L_P \leq 70$ dB(A). Conditions: distance 1 m; measured without load an input speed of $n_1 = 3000 \text{ min}^{-1}$; $i=10$.
- Wide range of adapter flanges matching the most popular brands of motors
- Units are factory filled with synthetic grease to NLGI consistency class 00, in the absence of contamination the lubricant requires no periodical changes.
- Ambient temperature min -20°C , max $+30^\circ\text{C}$. For temperature higher than 30°C please consider derating factor ft.
- Housing temperature must not exceed $T_{\text{max}} = 90^\circ\text{C}$.

LCK

PLANETARY PRECISION RIGHT ANGLE GEARBOX

LCK replicate in the right angle layout excellent features already typical of the inline products LC series. Right angle layout is the solution to space problems often posed by increasingly compact machines.

This serie represent a flexible solution, and economic alternative together with an optimal performance and reliability.

LCK

Product Line Up:

- Optimal Torque Density
- Optimal Acceleration and Nominal Torques
- Optimal Radial and Axial loading capacities
- Designed for Cyclic and Continuous duty
- Optimal Torsional Stiffness
- Geometrical Backlash less than 6 arcmin
- Universal design allow any mounting orientation

7 FEATURES OF LCK SERIES

Gear units of series LCK replicate in the right angle layout the brilliant features that are already typical of the in-line products of the LC series, with the additional benefit of a facilitated installation in tight spaces.

- Available in one only backlash option, corresponding to following values:
2-stage units: standard $\phi_s \leq 6'$;
3-stage units: standard $\phi_s \leq 8'$;
- A high IP rating (IP64) provides inner parts with protection against the ingress of dust and liquids.
- Input section oil seals made from a Fluoroelastomer compound are supplied as standard.
- Noise pressure level $L_p \leq 70$ dB(A). Conditions: distance 1 m; measured without load an input speed of $n_1 = 3000 \text{ min}^{-1}$; $i=10$.
- Wide range of adapter flanges matching the most popular brands of motors
- Units are factory filled with synthetic grease to NLGI consistency class 00, in the absence of contamination the lubricant requires no periodical changes.
- Ambient temperature min -20°C , max $+30^\circ\text{C}$. For temperature higher than 30°C please consider derating factor ft.
- Housing temperature must not exceed $T_{\text{max}} = 90^\circ\text{C}$.

PLANETARY PRECISION GEARBOX FOR PULLEY DRIVES

SL - Planetary precision gearbox for pulley drives Series knows no rivals in compactness, efficiency and optimization for timing belt pulley drive systems.

This series is the ideal complement to conveyor belt servo-drives and all other applications needing to combine high precision with ultra-compact size.

Product Line Up:

- Higher Torque Density
- Higher Acceleration and Nominal Torques
- Higher Radial and Axial loading capacities
- Designed for Cyclic and Continuous duty
- Higher Torsional Stiffness
- Geometrical Backlash less than 6 arcmin
- Optionally available with a timing belt pulley.
- Quiet running
- Universal design allow any mounting orientation

8 FEATURES OF SL SERIES

The new SL Series from Tecnoingranaggi knows no rivals in compactness, efficiency and optimisation for timing belt pulley drive systems. Reduced backlash units from the SL Series are the ideal complement to conveyor belt servo-drives and all other applications needing to combine high precision with ultra-compact size.

- Available with either standard (STD) or reduced (LOW) backlash:
1-stage units: standard $\varphi_S \leq 12'$; reduced $\varphi_R \leq 6'$
2-stage units: standard $\varphi_S \leq 15'$; reduced $\varphi_R \leq 8'$
- A high IP rating (IP64) provides inner parts with protection against the ingress of dust and liquids.
- Input section oil seals made from a FI or elastomer compound are supplied as standard.
- Noise pressure level $L_P \leq 70$ dB(A). Conditions: distance 1 m; measured without load an input speed of $n_1 = 3000 \text{ min}^{-1}$; $i=10$.
- Units are factory packed with synthetic grease to NLGI consistency class 00, in the absence of contamination the lubricant requires no periodical changes.
- Ambient temperature min -20°C , max $+30^\circ\text{C}$. For temperature higher than 30°C please consider derating factor ft.
- Housing temperature must not exceed $T_{\text{max}} = 90^\circ\text{C}$.

* Applies for timing belt application

TS

KR

PLANETARY PRECISION RIGHT ANGLE GEARBOX

The flexible, efficient economical solution to applications calling for space saving right angle drives with minimal backlash.

Available in different configurations with numerous input and output configuration.

Product Line Up:

- Best combination of dynamics, compactness and precision
- Designed for Cyclic and Continuous duty
- Good Torsional Stiffness
- Geometrical Backlash less than 8 arcmin

KR

9 FEATURES OF KR SERIES

Bevel helical units type KR, manufactured under the most stringent quality specifications, are designed for dynamic and accurate applications where light weight and space effectiveness are a factor.

Many options can be selected from the catalogue as far as motor adapters and output shaft configurations that facilitate the installation on the driven equipment.

- Available in one only backlash option ($\varphi_s \leq 8'$)
- Single reduction: ratios $i = 1, 2, 5$
- Radial ball bearings (SB) are of standard supply, while taper roller bearings (HB) can be optionally specified for particularly demanding loading conditions
- Degree of protection IP65
- Oil seals from fluoroelastomer compound as standard
- Noise pressure level $L_P \leq 70$ dB(A). Conditions: distance 1 m; measured without load an input speed of $n_1 = 3000$ min⁻¹
- Lubrication optimized for the type of duty specified when ordering, in the absence of contamination the lubricant requires no periodical changes.

duty	KR 010 ... KR 040
S1 (continuous)	Synthetic oil viscosity ISO VG 220
S5 (intermittent)	NLGI grease consistency 00

- Ambient temperature min -20°C, max +30°C. For temperature higher than 30°C please consider derating factor f_t .
- Housing temperature must not exceed $T_{max} = 90^\circ\text{C}$.

Please contact us for other motor adapters and input shaft bore.

Technical drawing of a square flange. The drawing shows a square flange with a central circular hole. The outer diameter is labeled as Ø 68. The central hole diameter is labeled as Ø 16. There are eight mounting holes arranged in a circle, with a diameter of Ø 6. The distance between the center of the central hole and the center of one of the mounting holes is labeled as 5.5. The flange has a 45° chamfer on its outer edge. The drawing is labeled with a square symbol and the number 62.

Technical drawing of a mechanical part, showing a front view and a side view.

Front View Dimensions:

- Total width: 133.5
- Central bore diameter: 52
- Flange thickness: 1.5
- Distance from center to mounting hole center: 53.5
- Distance from center to threaded section: 28
- Distance from center to flange edge: 25
- Distance from center to mounting hole center: 1.5

Side View Dimensions:

- Height: 5 h9
- Diameter: 17
- Thread specification: M5x12.5
- Distance from center to mounting hole center: 16 k6

Technical drawing of a 163 series ball valve, showing a front view and a side view.

Front View Dimensions:

- Total width: 163
- Mounting hole spacing: 53.5
- Flange dimensions: 28, 1.5, 25

Side View Dimensions:

- Height: 17
- Mounting hole diameter: 5 h9
- Base dimension: 16 k6

Valve specification: M5x12.5

KR

9.7.2 MACHINE SHAFT

Pivot of driven equipment should be made from high grade alloy steel. Table below shows recommended dimensions for the Customer to consider when designing mating shaft. A device retaining the shaft axially is also recommended (not shown). The number and size of relative tapped holes at shaft end depend on application requirements.

H

	A1	A2	A3	A4	B	B1	B2	C	D	E	R _{MAX}	 UNI 6604	S
KR 030	≥ 26	18 h7	17	18 h7	129	18	90	32	2	2	0.5	6x6x25 A	1
KR 040	≥ 36	28 h7	27	28 h7	149	28	90	50	2	2	0.5	8x7x35 A	

NB: The choice of driven shaft with a UNI 6604 key as described introduces increased backlash into the application compared to that achieved by a configuration with just the gearbox ($\varphi_s \leq 8^\circ$).
