// SAFE SWITCHGEAR FOR DEMANDING AND CRITICAL APPLICATIONS

Wireless

Automation

Extreme

Meditec

»Safe switchgear for demanding and critical applications«. True to this motto, steute has been providing its customers with innovative, practical and durable switchgear solutions – for over 50 years.

When our customers are successful, so are we. Because we always focus on our customers, our company has grown steadily and sustainably over the last decades. Steute is committed to continuing this growth – in close cooperation with our customers.

We are situated in East Westphalia, a key region for machine building and electrical goods manufacturing. It is home to qualified specialists committed to developing and manufacturing innovative products. It is also the location of renowned universities, research and educational institutions to which we maintain healthy contacts.

Markets are no longer restricted by national borders. This is why our products are developed and tested for extreme conditions all over the world. We take care to ensure that our products are always certified according to the latest international standards. In every industrial or emerging nation in the world, steute has access to qualified specialists who can guarantee competent support and a quick service.

As a medium-sized company we are able to react with speed to customer wishes and market trends. We are continually developing innovative products and using new technologies as we consistently open up new fields of application for our switchgear.

steute is currently active in four different business fields, producing switchgear, sensors and control units for use in industry and in medical equipment:

Wireless

Cable free switchgear and sensors for use in machinery and process plants. These industrial-strength wireless switches communicate with higher level control systems via reliable radio transmission. »Energy harvesting« can play a major role in these products.

Automation

Standard and customised switchgear for machinery and process plants. Tried and tested electromechanical and non-contact technologies for classical applications in industrial automation and process control – always with a view to the latest global requirements.

Extreme

Switchgear and sensors for use in extreme environments or under extreme conditions. Certified products for use in hazardous areas worldwide (e. g. ATEX, IECEx, GOST).

Meditec

A comprehensive range of standard and customised foot and hand controls for medical devices, meeting the highest ergonomic and availability requirements. Produced in accordance with the certified EN ISO 13485 quality management system for medical products.

The following information provides an overview of our standard range of switchgear for complex and demanding applications. We will be happy to provide you with any additional information you require. If you cannot find the solution for your application: just get in touch. We have already helped numerous customers by developing »tailor-made« switchgear for their individual needs.

Marc Stanesby
Managing Director
steute Schaltgeräte GmbH & Co. KG

Multifunction handles thermoplastic

// Series TG
from page 10

Multifunction handles

Application

The door handle switches are suitable for unlocking of solenoid interlocks on sliding, hinged and removable guard doors that need to be closed to secure the required operators' safety. By integration of the emergency-stop, start, enabling, reset and LED display function the door handle switch allows for additional monitoring and operation of the machine directly at the door or flap.

Design and operating principle

The door handle switches are available with NO or change-over contact. The emergency-stop push-button can either be provided with one or two NC contacts and conform to EN 418. All door handle switches shown in this chapter are equipped with a plug-in connector. Different colours of push-button caps for door handle switches series TG and TGM are available on request. For customised versions we give support by providing a »selection guide« at the end of the chapters TG and TGM. This page should be faxed to steute. Do not hesitate to contact us.

All door handle switches described in this chapter bear the CE mark according to the low voltage directive 06/95/EG.

Application

On sliding doors

On hinged doors

On removable doors

On double doors

Multifunction handles // Series TG

Features/options

- Thermoplastic handle
- High life time
- Green and red LED
- Green enabling push-button:
TG-W GR xx: single break change-over, order No. 97 75 50 01
TG-ÖS GR xx: 1 NC/1 NO contact, order No. 97 15 50 02
- Protection class IP 65
- With plug-in connector M12 x 1, 8-poles
- Available as radio switch with solar cell, for detailed information see catalogue »Industrial switchgear with radio technology«

Multifunction handles

// Series TGM, variants

Features/options

- Aluminium, black anodised
- Emergency-stop push-button per EN 418:
TGM-W GR 10 x 1-channel ⊖
TGM-W GR 20 x 2-channel ⊖
- Green and red LED
- Blue enabling push-button: single break change-over
- Protection class IP 67
- TGM-W GR 10 x: with plug-in connector M12 x 1, 8-poles
TGM-W GR 20 x: with plug-in connector M12 x 1, 12-poles
- Different door handle available on request

Features/options

- Stainless steel V2A
- Door handle without electrical function
- Application on double doors
- Length: 213 mm
- Different door handle available on request
- Order No. 97900908

SEALING OF A PUSH-BUTTON ON A DOOR HANDLE SWITCH

Multifunction handles

// Series TGM, variants

Features/options

- Stainless steel V2A
- Variant for right-hinged doors
- Green and red LED
- Green enabling push-button:
TGM-W GR xx: single break change-over
TGM-ÖS GR xx: 1 NC/1 NO contact
- Protection class IP 67
- With plug-in connector M12 x 1, 8-poles
- Different door handle available on request

Features/options

- Stainless steel V2A
- Variant for left-hinged doors
- Green and red LED
- Blue enabling push-button:
TGM-W GR xx: single break change-over
TGM-ÖS GR xx: 1 NC/1 NO contact
- Protection class IP 67
- With plug-in connector M12 x 1, 8-poles
- Different door handle available on request

Appendix

// Accessoires

Features/options

- Coupling for plug-in connector M 12 x 1
- With prewired cable, different length available
- Angled or straight coupling available
- Ordering unit: 1 piece

Features/options

- Coupling for plug-in connector M 23 x 1, 12-poles
- To be wired, soldering connection
- Art.-Nr. 01.36.2200
- With prewired cable available on request
- Ordering unit: 1 piece

// Coupling M12 x 1

// Coupling M23 x 1, 12-poles

Appendix

// Wiring example

Features/options

- In combination with safety relay module SRM 21 RT2 and solenoid interlock STM 295
- Integrated emergency-stop push-button
- Enabling push-button: Unlocking of door by providing power to solenoid of solenoid interlock STM 295
- Green LED: lights up with closed and locked door;
- red LED: lights up with providing power for unlocking of door
- Start push-button: Machine start

Legend

- ⊖ positive break NC contact
- ⊕ actuated
- ⊖ not actuated

// Door handle switch for unlocking of a solenoid interlock

SINCE MANY YEARS STEUTE SWITCHGEAR HAVE BEEN APPROVED IN THE CRITICAL APPLICATIONS OF CONTROL TECHNOLOGY

LEGEND

positive break NC contact

YE	yellow

steute develops and manufactures safe switchgear for demanding and critical application. Besides a comprehensive standard range of products for »Wireless, Automation, Extreme and Meditec« applications, we also and increasingly develop customised switchgear for extreme conditions in all four business fields. Some examples: emergency pull-wire

switches for the mining industry, position switches for industrial automation and control panels for laser surgery. Our head office is in Löhne, Westphalia, Germany; worldwide sales are conducted through steute's subsidiaries and trading partners.
