

PLC I/O Unit	CS1W-OD262
Connector Terminal Conversion Unit	XW2D-40G6
Connecting Cable	XW2Z-□□□B
Connections Diagrams	<p>The diagram illustrates the internal wiring of the connecting cable XW2Z-□□□B between the PLC I/O Unit CS1W-OD262 and the Connector Terminal Conversion Unit XW2D-40G6. It shows two 40-pin connectors, CN1 and CN2, with 20 pins each. The left side of CN1 is labeled 'Word m (m+2)' and the right side of CN2 is labeled 'Word m+1 (m+3)'. The diagram shows the internal wiring of the cable, including COM0(+V), COM1(+V), and 0V lines, and the connection to a 24 VDC power source.</p>

Although the COM(+V) and 0V terminals in rows A and B of CN1 and CN2 are respectively connected internally, wire to all the terminals.
