

Remote Terminal	GT1-OD32ML-1
Connector Terminal Conversion Unit	XW2D-40G6
Connecting Cable	XW2Z-□□□B
Connections Diagrams	<p>The diagram illustrates the internal and external connections for two words, Word m and Word m+1. Each word has a set of 20 terminals labeled A1 through A20 and B1 through B20, arranged in two columns. To the left of each column is a vertical stack of 8 terminals labeled L, and to the right is another vertical stack of 8 terminals labeled L. At the top of each column are terminals V and G. The diagram shows internal connections between A and B terminals (e.g., A1-B1, A2-B2, ..., A20-B20) and between L terminals (e.g., L1-L8, L9-L16, L17-L24). External connections are shown between V and G terminals of the same word and between V and G terminals of different words. A power source symbol is shown at the bottom.</p>

Each V and G terminal is connected internally. V and G on the connector and terminals V and G are connected internally.
